

EYES FOR AFRICA October 2021

Due to covid 19 Pandemic EFA has postponed our trips for the time being until it is safe to return .

Our volunteers and myself are very keen to return to the remote villages and continue our free sight restoring campaigns to the underserved.

The Local Health officials keep us informed of the situation in Ethiopia and will advice us when it is safe to return. In the meantime our equipment is safely stored

Unfortunately our pharmaceuticals have expired and will be discarded prior to our next campaign .

With support from our new sponsor Virtual-i we will be purchasing another ophthalmic microscope which means we can employ two surgeons and aim to restore sight to 400 people that are blind with cataracts .

We look forward to our next trip , fingers crossed sometime in 2022.

Founded on March 29, 2018 by Veysel Sinan Geylani, Virtual-i Technologies provides intelligent solutions that allow underwriters to assess risks before insuring them. The company, with offices in Zurich and Dubai, enables the insurance industry to shift from good faith underwriting to dynamic and data-based decision making.

Created and patented by Virtual i Technologies, Virtual Risk Space™ [VRS] offers an innovative platform to assess risks of different sizes, from micro to large, before they happen. As a unique, technology-based and cost-effective platform, [VRS] brings immediate and visible results to the insurance industry.

Virtual i Technologies aims to transform the way the insurance industry carries out risk
